Description :

Prsentation de l'diteurThe Tiger and King Tiger tanks gained legendary status during World War II. Numerous tank commanders attained phenomenal numbers of kills and accomplished extraordinary feats during combat in these tanks, increasing the legend to near mythic proportions after the war. By the end of the war, the Germans created eleven Army and three Waffen-SS heavy tank battalions. These heavy tank battalions were employed in nearly every part of Europe against almost every enemy of Germany. As vast in

breadth and scope as the employment of Tiger battalions themselves, this book provides historical examples and analysis of heavy tank battalions' actions in North Africa, Normandy, Italy, the Ardennes Offensive, and numerous battles on the Eastern Front including Operation Zitadelle/the Battle of Kursk, Operation Bagration, the battle of the Cherkassy Pocket, late war attacks to relieve Budapest, and many other, more minor engagements.
